

Water-Based Defoamer Concentrate

TRANS-7664

A fatty alcohol, water-based defoamer developed as a high solids concentrate for ease of shipping and designed to be used as received or diluted with water

- Effective to use on paper machines, screen rooms, effluent systems, or any application requiring a water-based defoamer
- Performs over a wide range of temperatures, up to 160°F/71°C
- Requires minimal production equipment to dilute to lower concentrations
